The problem...

What is happening?

Students are experiencing high levels of poverty, toxic stress/trauma, housing instability, and basic needs are not being met.

How can we help?

We must organize partnerships with community organizations and come together in a shared vision within our school to meet our students where they are and put into place the supports needed for their success.

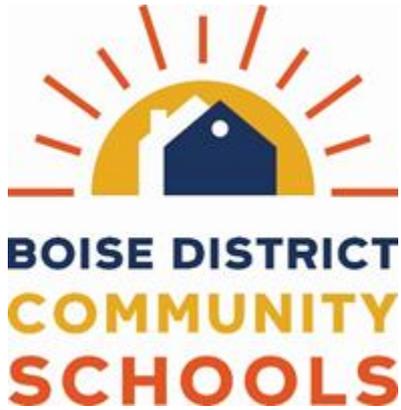

Why must we buy-in?

By sharing expertise and resources, schools and communities act in unison to transform schools into permanent partnerships of excellence working to negate the multiple socio- economic determinants of health and educational disadvantage.

Solution

Create A Community School

A **community school** is both a place and a set of partnerships between the **school** and other **community** resources. Its integrated focus on academics, youth development, family support, health and social services and **community** development leads to improved student learning, stronger families and healthier communities.

- Mission: Engaged Communities, Increased Opportunities, Successful Students and Families
- Vision: Community schools foster partnerships by focusing shared resources that enhance pathways to learning in a welcoming culture of high expectations.

End Goal

Our ultimate goal is to make our students and families lives better.

The true measure of our achievement is the quality of care we provide.

We will know we are successful when our students succeed. (emotionally, academically, financially, physically, socially etc.)

It's not about fair, it's about creating equity. It's not about enabling, it's about EMPOWERING.

There is hope...
